

AMENDMENTS TO THE CLAIMS:

Claims 15-20 have been cancelled, without prejudice. Claims 1-14 have been amended.

This listing of claims will replace all prior versions and listings of claims in the

Application:

Claim 1 (currently amended): A plasma display panel including a display filter arranged in alignment with a screen of a display unit, said display filter having a function of absorbing visible rays having a wavelength other than wavelengths of red, green and blue lights.

Claim 2 (currently amended): The display filter plasma display panel as set forth in claim 1, wherein said function is accomplished by:

(a) a transparent substrate positioned in alignment with said screen; and

(b) a light absorber mixed in said transparent substrate, said light absorber

absorbing visible rays having a wavelength other than wavelengths of red, green and blue lights.

Claim 3 (currently amended): The display filter plasma display panel as set forth in claim 1, wherein said function is accomplished by:

(a) a transparent film;

(b) a light absorber mixed in said transparent film, said light absorber absorbing

visible rays having a wavelength other than wavelengths of red, green and blue lights;

and

(c) a transparent substrate to which said transparent film is adhered, said

transparent substrate being positioned in alignment with said screen.

FAX. 603.668.8567

Claim 4 (currently amended): The display filter plasma display panel as set forth in claim 1, wherein said function is accomplished by:

- (a) a transparent film having an upper and a lower surface, said film having an adhesive layer on one of said upper and lower surfaces;
- (b) a light absorber mixed in said adhesive layer, said light absorber absorbing visible rays having a wavelength other than wavelengths of red, green and blue lights;
and
- (c) a transparent substrate to which said transparent film is adhered through said adhesive layer, said transparent substrate being positioned in alignment with said screen.

Claim 5 (currently amended) The display filter plasma display panel as set forth in claim 1, wherein said function is accomplished by:

- (a) a transparent film; and
- (b) a light absorber mixed in said transparent film, said light absorber absorbing visible rays having a wavelength other than wavelengths of red, green and blue lights,
said transparent film being adhered to said screen.

Claim 6 (currently amended): The display filter plasma display panel as set forth in claim 1, wherein said function is accomplished by:

- (a) a transparent film having an upper and a lower surface, said film having an adhesive layer on one of said upper and lower surfaces; and
- (b) a light absorber mixed in said adhesive layer, said light absorber absorbing visible rays having a wavelength other than wavelengths of red, green and blue lights,
said transparent film being adhered to said screen through said adhesive layer.

Claim 7 (currently amended): The display filter plasma display panel as set forth in claim 2, wherein said light absorber is comprised of pigment.

Claim 8 (currently amended): A plasma display panel including a display filter arranged in alignment with a screen of a display unit, said display filter having a function of absorbing only external light in an area where said display unit is used.

Claim 9 (currently amended): The display filter plasma display panel as set forth in claim 8, wherein said function is accomplished by:

(a) a transparent substrate positioned in alignment with said screen; and
(b) a light absorber mixed in said transparent substrate, said light absorber absorbing visible rays having a wavelength other than wavelengths of red, green and blue lights.

AI X CM

Claim 10 (currently amended): The display filter plasma display panel as set forth in claim 8, wherein said function is accomplished by:

(a) a transparent film;
(b) a light absorber mixed in said transparent film, said light absorber absorbing visible rays having a wavelength other than wavelengths of red, green and blue lights; and
(c) a transparent substrate to which said transparent film is adhered, said transparent substrate being positioned in alignment with said screen.

Claim 11 (currently amended): The display filter plasma display panel as set forth in claim 8, wherein said function is accomplished by:

(a) a transparent film having an upper and a lower surface, said film having an adhesive layer on one of said upper and lower surfaces;

(b) a light absorber mixed in said adhesive layer, said light absorber absorbing visible rays having a wavelength other than wavelengths of red, green and blue lights; and

(c) a transparent substrate to which said transparent film is adhered through said adhesive layer, said transparent substrate being positioned in alignment with said screen.

Claim 12 (currently amended): The display filter plasma display panel as set forth in claim 8, wherein said function is accomplished by:

(a) a transparent film; and

(b) a light absorber mixed in said transparent film, said light absorber absorbing visible rays having a wavelength other than wavelengths of red, green and blue lights, said transparent film being adhered to said screen.

Claim 13 (currently amended): The display filter plasma display panel as set forth in claim 8, wherein said function is accomplished by:

(a) a transparent film having an upper and a lower surface, said film having an adhesive layer on one of said upper and lower surfaces; and

(b) a light absorber mixed in said adhesive layer, said light absorber absorbing visible rays having a wavelength other than wavelengths of red, green and blue lights, said transparent film being adhered to said screen through said adhesive layer.

Claim 14 (currently amended): The display filter plasma display panel as set forth in claim 9, wherein said light absorber is comprised of pigment.

Claim 15 - 20 (cancelled)
